Privest Wireless Indoor Siren

The Privest Wireless Indoor Siren is the all–in–one module from ABUS Security–Center. You can install this combination signal generator indoors. The signal is transmitted to and from the alarm control panel via wireless technology.
In the event of an alarm, the siren generates an extremely loud tone (more than 105 dB of acoustic pressure). The stable housing is tampering–protected by a wall contact and a lid contact. The power supply is already integrated in the housing (5 x CR123, 3 V lithium battery).

Product highlights:

- Effective alarming of residents in case of events, e.g.fire
- Loud Piezo sounder with 105 dB acoustic pressure
- Bi–directional wireless operation
- Robust style
- Tampering–protected by lid contact and wall contact
- Power supply by batteries for autonomous installation
- Up to 3 sirens (indoors and outdoors) can be integrated

Privest Wireless Indoor Siren

Technical Data	
Radio frequency	868.65 MHz AM
Modulation	AM
Supervision	yes
Battery	5x CR123 3V lithium
Battery service life	approx. 2 years
Siren volume	105dB @ 1m
Weight	440g
Dimensions (WxHxD)	120x146x50 mm
Operating temperature	–25°C – 60°C
IP protection class	IP44
